

ANTI-FLASH OPS GLOVE

DESCRIPTION and USE

The anti-flash gauntlet glove worn by Navy Operations Room personnel consisting of a light coloured unlined chrome tanned leather glove with a flame resistant treated textile gauntlet cuff. It is designed to protect the hands and lower arms of wearers from flash burns from conventional weapons explosions. Operations Room personnel are required to operate computer consoles and communication keys and the gloves must have good fit and tactility to enable them to operate their equipment effectively and for this reason the glove must be table cut by experienced glove makers.
