

## WINCHMANS GLOVE

### DESCRIPTION and USE

Designed for use with a winch during search and rescue operations, this glove offers high levels of comfort, dexterity and protection. Made from a top grade cape sheep nappa leather processed in the UK, this leather not only has water and sweat resistant properties but provides abrasion resistance thus increasing the durability and longevity of the leather by preventing wear on contact surfaces and materials. Reinforcement on the palm and thumb is provided by a goat skin leather. The glove is table cut in the traditional manner and sewn full pique. It is supplied in single hands only in both men's and women's sizes. The women's sizes are cut from true ladies patterns, not small men's patterns. These are sold as single hands only.
